- AI-assisted analytics workflows

Product & Agile

- SAFe®, Scrum, PI Planning
- Roadmap & backlog
- Stakeholder management
- Executive communication & storytelling
- Lean Six Sigma White Belt, DMAIC, PDCA

Data & Platforms

- Snowflake, Neo4j (Cypher)
- Oracle, PostgreSQL
- AWS (Redshift, S3), Teradata
- Python, SQL, Apache Airflow
- Power BI, Tableau, SAP BO

EDUCATION

MSc Data Analytics, IT

CCT College Dublin · 2021–2022

BSc Computer Science & Eng.

Universidad Complutense de Madrid · 2006-2013

Erasmus — Master d'Informatique

Sorbonne Université (Paris VI) · 2011–2012

CERTIFICATIONS

Neo4j Certified Professional

Neo4j · 01/2025

Certified Generative AI Fundamentals

Udacity · 12/2024

SAFe® 6 Product Owner/PM

Scaled Agile Inc · 06/2023

Certified ScrumMaster® (CSM®)

Scrum Alliance · 02/2020

PROFILE

Analytics-driven professional with 10+ years turning complex, multi-source data into clear, actionable insights for senior stakeholders. Strong SQL and BI background (Power BI, Tableau, SAP BO, Snowflake, Python) combined with proven experience presenting data-driven recommendations to leadership and driving decisions across cross-functional and global organisations. Skilled at using AI-enabled tools to accelerate insight generation and improve analytical efficiency. Certified ScrumMaster® and SAFe® Product Owner with strong stakeholder management skills and professional fluency in Spanish, English, and French.

WORK EXPERIENCE

Solution Delivery Manager | Digital Product Owner

Pfizer — Dublin, Ireland | *01/2025 – Present*

- Own the strategy and roadmap for CI Loop, a global Continuous Improvement analytics platform used by 15k+ manufacturing users, translating business questions into data requirements and actionable product decisions.
- Built and deployed an AI-powered assistant that analyses large volumes of user feedback data to surface insights, quantify improvement opportunities, and support evidence-based backlog prioritisation.
- Regularly present data-driven recommendations and product performance insights to senior stakeholders and cross-functional leadership across Manufacturing, Digital, Analytics, and Operational Excellence teams.
- Lead evaluation of Agentic AI and automation opportunities to improve analytics efficiency, knowledge accessibility, and the speed and scale of insight delivery.
- Defined IMEx governance standards and reporting structures enabling consistent, comparable measurement of improvement initiatives and business outcomes across a global network.
- Partner with stakeholders across a family of four complementary manufacturing-analytics platforms within the Digital Operations Centre, aligning data and reporting strategy at ecosystem level.
- Owned Live Visual Stream Map (LVSM) end-to-end at Ringaskiddy for the Lorbrena product line: functional design, the Neo4j-based technical solution, and the first stakeholder demos that secured €640k in implementation budget and laid the foundation for an estimated $2.3M in inventory savings.

Data Engineer, Manager

Pfizer — Dublin, Ireland | *01/2023 – 12/2024*

- Led the technical delivery of the Shipping Dashboard (Supply Chain Digitalization Program) at the Grange Castle site, managing a team of 3 Data Engineers, running workshops with business SMEs, and owning functional design in close collaboration with the Product Owner and UX.
- Replaced manual Excel-based shipment planning with a connected data solution, generating an estimated 416 annual hours of operational savings and achieving strong adoption and positive feedback across the business.
- Built SQL-based data models and reporting across multiple manufacturing-performance dashboards, improving traceability and executive visibility for senior stakeholders, and increasing the accuracy of release-signal tracking (inspection lot end date) across the Pfizer network.
- Used Python, SQL, Neo4j, Snowflake, and Apache Airflow to build and maintain scalable analytics solutions supporting global manufacturing operations.
- Led the migration of ETL workloads from Amazon Redshift to Snowflake, modernising the

underlying data infrastructure for enterprise reporting.

- Partnered directly with Product Owners and business stakeholders to translate ambiguous business questions into structured analyses, delivering insights through Power BI.

Business Data Analyst | Operations Performance

CNP Santander Insurance — Dublin, Ireland | *08/2020 – 12/2022*

- Delivered data-driven insights and Power BI reporting directly to financial department leadership, informing operational and strategic decisions.
- Led cross-functional operations projects, managing financial and IT stakeholders through data migrations and analytical solution design.
- Owned the data lifecycle and quality checks, and built ETL/reporting solutions using R, Oracle, PeopleSoft, and SAP Business Objects.

Technology Liaison II, Financial Data Management

MetLife — Dublin, Ireland | *03/2018 – 08/2020*

- Supported data management and analysis across 100+ OLAP cubes spanning EMEA, Asia, and the Americas, handling stakeholder queries and custom report development.
- Led an Agile project to automate tax reporting, managing solution design, development, and documentation end-to-end.
- Ensured data accuracy and timeliness for constant-currency financial reporting processes in Essbase.

French Technical Support Analyst

Interaction (client: PrintFleet) — Travelling, Canada | *05/2017 – 03/2018*

- • Provided technical support and relationship management to clients in English, French, and Spanish, resolving complex issues under time pressure.

BI Consultant

Sopra Steria (client: Société Générale) — Madrid, Spain / Travelling France | *09/2013 – 04/2017*

- Managed and maintained a production data warehouse for a major French financial organisation, ensuring reliable data for enterprise reporting.
- Built ETL processes using Informatica PowerCenter, Bash, and SQL, and managed automation and prioritisation via Control-M.
- Developed dashboards using SAP Business Objects to support business decision-making.

ADDITIONAL INFORMATION

- **Silvia del Pino Award 2013** — awarded by fellow engineering students (Universidad Complutense de Madrid) recognizing spirit of fellowship.
- **2025: Padel Coach Certificate** — Padel Federation of Ireland Level 1 National Coaching Course
